Subject: Corrected SLERA
Attachments: Revised SLERA Field Sampling Plan Memo 9-18-20.pdf

Attached, please find a revised version of the SLERA submitted yesterday. I found two errors in the text concerning the total number of samples for sediments and surface water. The number of sediment sampling locations was changed from ten to eleven and the number of surface water samples was increased from three to four.

I have uploaded the revised SLERA to the CT government secure file transfer site with an updated file transfer form. Sorry for any inconvenience this may have caused.
